

FanLab

- Inspiring surroundings for innovation and meetings

ebmpapst

ebmpapst invites you to our 200 m2 FanLab – our showroom and R&D centre in Brøndby. Our clients are always welcome to use the premises and the meeting facilities.

Startups, clients and clients' clients. Everyone is welcome at ebmpapst's 200 m2 FanLab with its workshop and meeting facilities. In addition to product development, our FanLab can be used as a training centre, for seminars, teaching programmes with 'hands-on' elements, monthly sales and service meetings or client events.

"Come along with your ideas and put them to the test; we turn theory into practice!" This is CEO at ebmpapst in Brøndby Torben Kirkholt's invitation to you.

ebmpapst has the skills and the setting, and the process is effective. We promote the exchange of knowledge about product and market development in your industry, with topics such as energy efficiency and retrofit on the agenda for practically all markets. You can also test and run your innovative ideas in a realistic set-up in our test centre. And, of course, we will be on hand to provide input and feedback if you need it.

FanLab
